The evolution of the pharmaceutical industry through digitization

June 21st, 2023

Location: New Bracco HQ
Milan - Via Egidio Folli, 50

ABSTRACT

The digitalization process requires multidisciplinary skills for its correct implementation. The deployment of robotic units, automation solutions and of course the computerization of operations are fundamental elements that allow reducing costs and improving efficiency and productivity, and being flexible to changes in the biopharma industry. There is no doubt that there is a clear need to promote digitization within the pharmaceutical industry for different reasons. Some of them are based on the supply of medicines under increasingly demanding conditions to an increasingly globalized society, the demand for both traditional and new medicines is constantly growing, or the expansion of CDMO and CMO have turned these organizations into elements critical in the supply chain, adding more complexity to the global process, are some examples. During this workshop, it is intended to delve into the challenges and opportunities to accelerate a correct implementation of the digitization of processes.

ORGANIZING COMMITTEE

Lucia Ceresa (Charles River Microbial Solution)
Michele Simone (Bracco)
Angela Molaschi (Pharmatex) Past President
Mirko Gabriele President-Elect PDA Italy Chapter

AGENDA June 21st, 2023
